**[www.safetynews.co.uk](http://www.safetynews.co.uk) began compiling accident and fatality incidents in April of 2007. The following are accidents and fatalities involving confined spaces taken from their website. The majority involve work inside, on, or around confined spaces. There are some that may not actually involve confined spaces and are better characterized as machine guarding incidents. Occasionally, there are also some included simply because they were so bizarre. Trenching fatalities are not included. Accidents and fatalities involving mines, quarries, pits, and tunnels are included separately at the end of the document, as they are rarely regulated as confined spaces.**

**October 2013**

South Africa

**Confined space incident cleaning fuel tanks**

One worker has died and another is listed in critical condition following a confined space accident while cleaning the inside of diesel tanks at a fuel station in Boksburg. 4th October 2013
